- ICC/ANSI A117.1
- AB 1953
- cCUPC
- NSF 61
- CALGreen

IMPORTANT

Immediately upon receiving your Fiore product and removing it from its packaging we strongly suggest **INSPECTING** your Fiore product for potential freight damage. Any claims for damage visible or hidden, must be made immediately in order for the carrier to assume full responsibility and absorb any associated costs.

If damage or defect is discovered **DO NOT INSTALL** your Fiore product. Any claimed damage or defect to the finish of the product after the product has been installed will be excluded from any manufacturer warranty.

Always shut off your the main water supply before removing the existing faucet and/or installing a new one. Open the hot and cold knobs on the existing faucet in order to release built up pressure.

KITCHEN FAUCET INSTALLATION

INSTALLATION INSTRUCTIONS

1. Make sure upper rubber gasket is positioned close to the top of the shank so it rests on top of the countertop.
2. Align the shank of the new faucet with countertop faucet hole and place new faucet in position through the countertop hole. Make sure Faucet is centered in hole
3. Under the sink slide the lower rubber gasket onto the faucet shank - once the lower rubber gasket is in place slide the lock nut onto the shank.
4. Tighten the two screws on the lock nut to secure the faucet into place.
6. Check for leaks.

5. Connect and tighten the hot and cold supply hoses
