

NELLA™
CLEANING & CARE

VITREOUS CHINA BATHROOM SINKS

After each use it is recommended to thoroughly rinse your vitreous china sink and wipe dry with a soft cloth.

Vitreous China can withstand soft abrasive cleansers; therefore when there is a build-up of soap-scum, dirt and debris, these soft abrasive cleansers may be used.

NOTE: Strong abrasive cleansers should be avoided as they will damage the finished surface of the Vitreous China causing the surface to scratch and become dull.

Strong cleaners and chemicals such as acids, bleach, sodium chloride, lye, toilet bowl cleaner, drain cleaner, or hard water stain removers should not be stored under your Nella Vitreous China sink.

VITREOUS CHINA WATER CLOSETS (TOILETS), BIDETS & URINALS

After each use it is recommended to thoroughly rinse the exterior of your vitreous china toilet and wipe dry with a soft cloth.

Vitreous China can withstand soft abrasive cleansers; therefore when there is a build-up of soap -scum, dirt and debris, these soft abrasive cleansers may be used.

NOTE: Strong abrasive cleansers should be avoided as they will damage the finished surface of the Vitreous China causing the surface to scratch and become dull.

Do not use in-tank toilet cleaners as they can damage the flush valve or other working parts.

TOILET SEATS

When using a cleanser, a cleanser with a neutral pH should be used.

Avoid using aerosol products.

To avoid damage, do not allow abrasive chemicals and cosmetics (such as fingernail polish and aftershave) to come in contact with the toilet seat, as they can damage the finish.

NOTE: Soft and Strong abrasive cleansers should be avoided as they will damage the finished surface of the of the Chrome causing the surface to scratch and become dull. Do not use any products or cleansers with ammonia, bleach or acid.

CHROME AND PVD FAUCETS AND FIXTURES

After each use it is recommended to thoroughly clean your Nella faucets with a damp sponge or cloth and buff dry.

If water is allowed to rest on finished surfaces for extended periods of time, water deposits will appear on metal

surfaces once water has evaporated.

When using a cleanser, a cleanser with a neutral pH should be used.

NOTE: Soft and Strong abrasive cleansers should be avoided as they will damage the finished surface of the of the Chrome causing the surface to scratch and become dull. Do not use any products or cleansers with ammonia, bleach or acid.

Nella is unable to guarantee the efficacy of the cleaning methods above, given the extreme variation in climate, temperature, humidity and water hardness in different geographical locations. Adjustments may need to be made depending on each specific environment where the product is installed.

ACRYLIC BATHTUBS

After each use it is recommended to thoroughly rinse your Nella™ acrylic bathtub and wipe dry with a soft cloth.

When using a cleanser, a cleanser with a neutral pH should be used.

NOTE: Soft and Strong abrasive cleansers should be avoided as they will damage the finished surface of the Vitreous China causing the surface to scratch and become dull.

Avoid using aerosol products on the bath surface.
